Assured Edge Income Achievers

A fixed annuity with a flexible guaranteed lifetime withdrawal benefit

Growing your guaranteed lifetime income amount.

Know today what your retirement income could be

The maximum amount that may be withdrawn each contract year under the flexible guaranteed lifetime withdrawal benefit (GLWB) is referred to as the guaranteed lifetime income amount (GLIA).

The GLWB is automatically included in the contract for an annual fee of 0.95%.

Here's an example of how the initial GLIA is calculated:

\$100,000 Eligible premiums X Single coverage Age 65 = \$5,700 Initial GLIA

For each year that you wait to activate lifetime income, your GLIA grows

Here's an example of how the annual income credit is calculated:

\$5,700 Initial GLIA X | 6% | Income growth rate

\$342 Income credit

Here's an example of how the GLIA is calculated when income is activated at the end of year five (assumes no withdrawals):

\$5,700 Initial GLIA \$342 X 5 Income credit x deferral years **\$7,410**Per year

=

Withdrawals other than the GLIA or a change in covered person(s) may affect the GLIA. See the product overview or brochure for details.

Annuities are long-term products designed for retirement.

Withdrawals may be subject to federal and/or state income taxes. A 10% federal early withdrawal tax penalty may apply if taken before age 59% in addition to ordinary income tax. Partial withdrawals may reduce benefits and contract value.

Assured Edge Income Achievers

A fixed annuity with a flexible guaranteed lifetime withdrawal benefit

Growing your guaranteed lifetime income amount.

Know today what your retirement income could be

The maximum amount that may be withdrawn each contract year under the flexible guaranteed lifetime withdrawal benefit (GLWB) is referred to as the guaranteed lifetime income amount (GLIA).

The GLWB is automatically included in the contract for an annual fee of 0.95%.

Here's an example of how the initial GLIA is calculated:

\$100,000 Eligible premiums X Joint coverage Age 65

\$5,200 Initial GLIA

For each year that you wait to activate lifetime income, your GLIA grows by an income credit.

Here's an example of how the annual income credit is calculated:

\$5,200 Initial GLIA X Income growth rate

\$312 Income credit

Here's an example of how the GLIA is calculated when income is activated at the end of year five (assumes no withdrawals):

\$5,200 Initial GLIA \$312 X 5
Income credit x
deferral years

\$6,760Per year

Withdrawals other than the GLIA or a change in covered person(s) may affect the GLIA. See the product overview or brochure for details.

Annuities are long-term products designed for retirement.

Withdrawals may be subject to federal and/or state income taxes. A 10% federal early withdrawal tax penalty may apply if taken before age 59½ in addition to ordinary income tax. Partial withdrawals may reduce benefits and contract value.
