

Annuity Suitability or Annuity Best Interest Training: Where and When

In 2010, the National Association of Insurance Commissioners (NAIC) amended the *Suitability in Annuity Transactions Model Regulation* (Model 275) by adding producer training and education requirements that must be satisfied **PRIOR** to the solicitation of an individual annuity product. In 2020, the NAIC amended the existing Model 275 to include **Best Interest** obligations. The 2020 amendments retain the existing producer product-specific training requirement, while adjusting the state required annuity training (“generic annuity suitability”) to now include best interest.

SUITABILITY - In states that adopted the 2010 amendments to the suitability model, producers **PRIOR** to the solicitation of an individual annuity **MUST** complete both:

1. Insurer provided product-specific training, which explains material features of an insurer’s annuity product(s); and
2. An approved one-time four (4) credit-hour “generic annuity suitability” training/certification course provided through a Continuing Education (CE) provider.

BEST INTEREST - In states that adopted the 2020 **Best Interest** revisions to the existing suitability model, producers **PRIOR** to the solicitation of an individual annuity **MUST** complete both:

1. Insurer provided product-specific training, which explains material features of an insurer’s annuity product(s); and
2. Best Interest state mandated training provided through a Continuing Education (CE) provider. Best Interest training requirement can be completed one of two ways:
 - a. An approved newly created four (4) credit-hour state best interest training/certification course (“state best interest”); **OR**
 - b. If you have already completed the previous existing one-time, four (4) credit-hour “generic annuity suitability”, now take an additional one-time, one (1) credit-hour catch up best interest training/certification course, as applicable by individual state.
