

Eclipse Protector II IUL

An alternative solution for your GUL clients

When you think about long-term guarantees and competitive premiums, Guaranteed Universal Life (GUL) may come to mind. But if your clients are looking for affordable, lifetime protection and greater potential for cash accumulation – you may want to consider Indexed Universal Life (IUL) insurance.

Eclipse Protector II IUL offers the best of both worlds:

- Guaranteed protection that can last a lifetime
- Cash value growth potential
- Optional chronic illness protection
- Access to indexed accounts that can help weather market ups and downs – including our Rainbow Account

Eclipse Protector II IUL: competitive premiums with strong cash value growth potential

These comparisons do not take all material factors into account and must not be used with the public. These factors include but are not limited to: indexed account options, rider availability, surrender periods, or fees and expenses. For information regarding these and other factors please consult each company's respective policy guide.

Guarantees are based on the claims paying ability of the issuing company.

The Indexed Universal Life Series is designed first and foremost to provide life insurance protection. While the interest crediting options are attractive for cash accumulation, the product should always be promoted to first meet the death benefit needs of families and businesses with cash accumulation as a secondary benefit. One cannot invest in an index.

Life insurance products contain fees, such as mortality and expense charges (which may increase over time), and may contain restrictions, such as surrender periods. Policyholders could lose money in this product.

The no lapse guarantee is subject to the terms and conditions contained in the policy and may not be in effect even if premium payments are made. Please review the policy carefully.

The no lapse guarantee value could be negative if monthly premium payments are not made on time. This may require the policy owner to pay a larger monthly premium in order to restore the no-lapse guarantee value to zero or greater. The no-lapse guarantee value has no impact on the policy's cash value and cannot be surrendered or loaned against. Policy loans could cause the no-lapse guarantee value to be less than zero, which would require the repayment of the loan or the payment of additional premiums to restore the no-lapse guarantee value to zero or greater.

The Accelerated Death Benefit for Chronic Illness Agreement is a life insurance policy agreement that provides an option to accelerate the death benefit in the event that the insured becomes chronically ill.

The accumulation value, surrender value, loan value, and death benefit will be reduced by a chronic illness benefit payment under this agreement.

Additional agreements may be available. Agreements may be subject to additional costs and restrictions. Agreements may not be available in all states or may exist under a different name in various states and may not be available in combination with other agreements.

Policy loans and withdrawals may create an adverse tax result in the event of lapse or policy surrender, and will reduce both the surrender value and death benefit. Withdrawals may be subject to taxation within the first 15 years of the contract. Clients should consult their tax advisor when considering taking a policy loan or withdrawal.
