The above provides a brief description of the riders. Please refer to the rider policy for specific terms and conditions, which shall govern. Additional information may be found in the Agent Reference Manual on the agent's website. Not all riders are available on all products.

Life insurance products are not bank products, are not a deposit, are not insured by the FDIC nor any other federal entity, have no bank guarantee, and may lose value.

Living benefits are accessed through an advance of the policy's death benefit, provided the insured meets eligibility requirements under the applicable rider. An advance is treated as a lien secured by the death benefit of the policy and will reduce the death benefit payable if not repaid. The advance will accrue interest each year. The rate of interest will depend on the cash value of the policy and may vary. The lien may be increased if necessary to keep the policy in effect. This rider is added at no additional premium; however, we may charge a fee of up to \$250 for an advance payment.

Life insurance proceeds paid in the form of an accelerated death benefit when the insured has become chronically or terminally ill, and is otherwise eligible for benefits, are intended to receive favorable tax treatment under Section 101(g) of the Internal Revenue Code (26 U.S.C. Sec. 101(g)). There may be tax consequences in some situations in accepting an accelerated benefit payment amount, such as where total payments exceed the per diem limitation under the Internal Revenue Code. Please advise your clients to contact their tax advisor before taking an advance. Receipt of accelerated benefit payments may adversely affect the recipient's eligibility for Medicaid or other government benefits or entitlements.

This is a life insurance benefit that also gives clients the option to accelerate some or all of the death benefit in the event that they meet the criteria for a qualifying event described in the policy. This policy does not provide long-term care insurance subject to California long-term care insurance law. This policy is not a California Partnership for Long-Term Care program policy. This policy is not a Medicare Supplement policy.

Product features differ between long-term care insurance and life insurance accelerated death benefit riders. Accelerated death benefit riders pay an unrestricted advance of a portion of the life insurance death benefit when the insured experiences terminal or chronic illness as defined in the rider. Your clients do not have to show incurred care expenses associated with an accelerated death benefit. The maximum benefit payable is based on the policy's cash value and face amount. Any advance paid will reduce the death benefit of the policy. Long-term care policies or riders, on the other hand, pay benefits based on expenses incurred by the policyholder for long-term care. The total benefits available for long-term care insurance are selected by the policyholder at issue. Long-term care insurance is a stand-alone insurance policy or a rider designed to pay for the cost of long-term care services. Long-term care insurance may include coverage for such qualifying events as institutional care, care in a nursing home or skilled nursing facility, home care coverage, hospice care, respite care or community care.
