1. Premium bonus may vary by annuity product, premium band and surrender charge period selected and may be subject to a premium bonus recapture. Products that have premium bonuses may offer lower credited interest rates, lower index cap rates, lower participation rates and/or greater index margins than products that don't offer a premium bonus. Over time and under certain scenarios the amount of the premium bonus may be offset by the lower credited interest rates, lower index cap rates, lower participation rates and/or greater index margins.
2. EBR can only be elected at product issue. Rider charge is 0.95% of accumulation value at each contract anniversary during the surrender charge period. This rider charge is considered a penalty-free withdrawal, and does not reduce the penalty-free withdrawal available to you. The rider charge, under certain scenarios, may result in loss of premium.
3. Maybe subject to premium bonus recapture
