The capital and surplus/assets ratio measures the cushion a company has against a decline in the value of its assets before its surplus is depleted. *Higher levels of capital and surplus relative to assets help support a company's operations and growth.* The statutory surplus levels of Ameritas Life and Ameritas Life of New York are above Standard & Poor's capital requirements at the 'AAA' rating level.² This is an "Excellent" capital position, as defined by the S&P Financial Risk Profile which, along with low levels of financial leverage, provides adequate financial flexibility to address unforeseen market conditions.
